DETAILED ACTION

Allowable Subject Matter

1. Claims 1-7 are allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

Okamura et al. (USPN 6104530) teach a transparent laminate formed by laminating high refractive -index transparent film layers and metal film layers. Okamura teaches a transparent protective layer functioning as an antiglare layer or antireflection layer, and the optical filter for displays is as shown in Fig. 6 which includes anti-Newton ring layer (53). (col. 29, lines 31-38).

Regarding claim 1, none of the cited reference teaches or suggests a Newton ring prevention film comprising a transparent film in which projections are formed by surface roughening, a transparent film in which projections are formed by providing a projection coating layer, or either of these transparent films wherein a transparent electroconducting layer is further provided on the surface in which the projections are formed, wherein the average surface roughness (RA)/inter-projection distance (SM) of the surface comprising the projection is 0.8×10^{-3} to 2.0×10^{-3} , and the inter-projection distance (SM) is 150 μm or less.

Regarding claim 4, none of the cited prior art teaches or suggests a touch panel using a transparent film covered by a transparent electroconducting layer as an upper electrode substrate

Art Unit: 2674

and a transparent film or glass covered by a transparent electroconducting layer as a lower electrode substrate, said upper electrode substrate and said lower electrode substrate being set at a predetermined interval apart with the transparent electrode layers facing each other, wherein the centerline average surface roughness (RA)/inter-projection distance (SM) of the transparent electrode layer surface of at least one of said upper electrode substrate and said lower electrode substrate surface is 0.8×10^{-3} - 2.0×10^{-3} , and the inter-projection distance (SM) is 150 μm or less.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
